HD Server Solution

2008 has seen Prestaigne Charter become the leading EVS Server supplier in the broadcast industry around the globe, for sporting events and high scaled reality productions.

Prestaigne Charter are able to provide a tapeless broadcast facility with signals being ingested simultaneously onto HD EVS XT[2] 4CH & EVS XLS[2] 6CH both in high resolution and low resolution allowing producer's, editors (AVID or MAC) and on air operators instant access of material, seconds after it has been recorded and transferred in HD at six (6) times real time.

Major sporting events act as a driver for television broadcasters, as well as athletes, to raise their game. This year, with the biggest event of all – the Summer Olympic Games 2008, coverage is HD, the post production is tapeless and viewers expect instant analysis of every move. Near-live editing powered by disc-based recording engineered to perfection and deployed on a grand scale by Prestaigne Charter enables broadcasters to provide this analysis.

The Investment

Prestaigne Charter has invested substantially in Server Technology with over €7 million in EVS Associated equipment over the past three (3) years which includes the following equipment:

- EVS XT [2] HD/SD 6CH HDDR
- EVS XT [2] HD/SD 4CH HDDR
- EVS XLS [2] HD/SD 2CH HDDR
- EVS IP DIRECTORS (VERSION 5) HD/SD
- EVS IP EDIT SUITES HD/SD
- EVS X-STORE [2] HD/SD
- EVS XFS [2] HD (HD X-FILE)
- EVS X-FILE SD

Thus far the equipment has been put to good use at events such as the Commonwealth Games in Melbourne, the French Open Tennis at Roland Garros and for the Summer Olympics in Beijing. At all events, the systems were designed, built, commissioned and guaranteed by the Prestaigne Charter project team, to meet the exacting needs of these large scale world events.
